

Black is beautiful

LUCTRA® VITAWORK® convinces in the project in black

Iserlohn/Dorsten, 22.02.2022: The role of the color "black" has hardly changed in contemporary taste. Whether renovation in existing buildings or new construction - black enjoys great popularity both as an element in the facade and in interior design. There, black furniture and accessories can add elegance and dignity to the ambience.

Beautiful Black in the project

LUCTRA® realized a project in the new administration building of the construction company H. Hütter in Dorsten (North Rhine-Westphalia). The new premises were given the best lighting conditions with LUCTRA® VITAWORK®. In addition to compliance with all DIN regulations (EN 12464-1 as well as ASR 3.4 (Germany)), healthy lighting both at the computer workstations and in the meeting rooms is important to the company. "Our lighting had to be bright, daylight-controlled and glare-free," explains site manager Michael Diekert. "The high ceilings on the second floor posed a major challenge. Visually and functionally, VITAWORK® is the best luminaire compared to the competition. The transverse arrangement of the light panel also convinced us." In addition, the design-award-winning luminaire in black integrates very well into the architecture.

LUCTRA® VITAWORK® lighting solution for projects also available in black

The LUCTRA® VITAWORK® free-standing luminaire is suitable for illuminating the entire office building by means of direct and indirect light. The LEDs installed in the luminaire head provide either asymmetrical or symmetrical light distribution via a light panel, ensuring particularly uniform illumination of the entire work area. In addition, this creates a natural lighting impression and a tidy ceiling appearance.

Individual project wishes - no problem thanks to Made in Germany

All VITAWORK® models are manufactured at the production site in Kamen-Methler (NRW). Highly qualified employees assemble all parts for the entire product range in the LUCTRA® factory. The first priority here is manual work in accordance with the highest quality standards.
