

PRESS RELEASE

Multiple award winner: LUCTRA® TABLE LITE sets new standards

Iserlohn, 13.08.2024: We are proud and delighted to announce that our innovative table lamp LUCTRA® TABLE LITE has won the renowned Red Dot Award 2024. This latest award adds to the impressive list of prizes and accolades already received by our lamps. These include the iF DESIGN AWARD, the German Design Award, the PLUS X AWARD, the 'Ergonomic Product' seal of quality from the Institut für Gesundheit und Ergonomie (Institute for Health and Ergonomics; IGR), and the GS and TÜV certifications for tested safety and quality.

The LUCTRA® TABLE LITE has now received a total of seven noteworthy awards and nominations, including the Red Dot Award and a nomination for the UX Design Award. These accolades underscore the excellent quality and innovative approach that can be found in all aspects of the product's design and functionality.

Our LUCTRA® TABLE LITE is more than just a lamp; it is a masterpiece that not only illuminates rooms, but also enhances their aesthetic appeal and promotes the well-being of its users. With its modern, functional and sustainable design, it sets new standards in the world of lighting.

Awards and accolades

The LUCTRA® TABLE LITE has been recognised for its superior design, quality and functionality, as evidenced by the following awards and certifications:

reddot winner 2024

Red Dot Award:
One of the most renowned design awards worldwide, which highlights the excellent quality of our lamps.

German Design Award:
Recognition for excellent design that sets new standards.

iF DESIGN AWARD 2024:
Winner in the 'Product' discipline, 'Lighting' category. The LUCTRA® TABLE LITE impressed the expert jurors with its innovative combination of health-promoting light, intelligent gesture control and timeless design.

UX Design Awards

nominated 2024

UX Design Award (nominated):
Recognition for excellent usability and intuitive operation

PLUS X Award in these four categories:
High Quality, Design, Ease of Use and Functionality

IGR 'Ergonomic Product' seal of quality:
Confirmation of ergonomic quality from the Institut für Gesundheit und Ergonomie (Institute for Health and Ergonomics; IGR).

GS and TÜV certifications:
Confirmation of tested safety and high quality standards.

Innovation and design

The LUCTRA® TABLE LITE is characterised by its clean lines and elegant shape, making it stand out in any room. The combination of cutting-edge technology and minimalist design creates a harmonious balance between aesthetic appeal and functionality.

Healthy light:

The LUCTRA® TABLE LITE uses Human Centric Lighting (HCL), which draws on findings from research into the biological effect of light. The lamp is infinitely dimmable and the light colour can be adjusted to the user's personal circadian rhythm.

Gesture control – part of the product experience:

The three-dimensional gesture control allows users to easily and intuitively regulate the light by moving a hand underneath the lamp head. This innovative technology represents a new standard in lighting control.

Timeless design:

The refined, rounded design of the base, body and head, combined with the black colour, ensures the lamp aligns with current design trends and can be integrated seamlessly into any interior environment. The lightweight aluminium material keeps the lamp stable despite its slimline design.

User-friendly functions:

The intuitive controls and clever power supply via USB-C make the LUCTRA® TABLE LITE particularly user friendly. The lamp can be powered using a mains adapter, a laptop or a power bank.

“We are honoured to have received so many awards: they motivate us to continue developing excellent products that bring light and life to every room”, says Anna Kondakis, Marketing Manager New Work Solutions - LUCTRA®.

About LUCTRA®:

About LUCTRA®: LUCTRA® is the brand for good working light in the office or at home. For this purpose, the table, floor and mobile lamps included in the range provide light which not only illuminates, but also makes people happy, more efficient and simultaneously less tired. This works, because it transmits the right impulses for every situation.

To this end, the professional, biologically effective LED lamp system utilizes the latest scientific findings about the effect of light on human beings. It follows the principle of Human Centric Lighting, for short HCL, by focusing on human beings with their personal lighting needs for healthier and more efficient working and living. LUCTRA® light can almost perfectly simulate natural daylight and thus supports the user's personal inner clock.

LUCTRA® has already received numerous renowned design prizes such as the German Design Award and was brought to market in 2015 by the long-established company DURABLE Hunke & Jochheim GmbH & Co. KG. This company has been dedicated to professional work for more than a century: to its organisation, its processes and its equipment.
